## DIXIE-SOUTHERN ANNOUNCES OPENING OF A CORPORATE HEADQUARTERS IN BRADENTON, FLORIDA

---

Duette, FL -- March 1, 2011 -- Dixie Southern announces the opening of a corporate headquarters in Bradenton, FL. Stan Kinnett, President/CEO of Triple S & P, Inc. dba Dixie-Southern stated the opening will be on March 1, 2011 and it will be located at 9135 58th Drive East, Bradenton, FL 34202. The new Corporate Headquarters will house the sales, estimating, finance, human resources and administration departments. The current Duette, Florida location will remain the Engineering and Manufacturing/Quality Center with Project Management and Procurement.

In discussing reasons for the move, Stan commented, "The Duette facility has served the entire company very well for many years. As we've made changes to our business model over the past year and outlived some of our existing office space, it became obvious that certain functions were better served closer to Sarasota/Bradenton. This will allow us to serve our customers better and interact with our supplier and service providers more regularly."

Dixie-Southern has over 35 years of experience and is qualified by the API (American Petroleum Institute), AWWA (American Water Works Association), ASME (American Society of Mechanical Engineers), AWS (American Welding Society) and UL (Underwriters Laboratories). They continue to be a leader in the custom steel fabrication of ASME code and non-code steel tanks, pressure vessels, refractory ductwork, large diameter pipe, spool pieces, HRSG Exhaust, filters, stacks, dust collectors, chutes, bins, launders, hoppers, towers, silos and other related fabrications. Dixie-Southern specializes in oversized capabilities and overweight handling of steel plate or pipe fabrication of industrial process components with a variety of metals and alloys including carbon steel, stainless steel, jessop, hastelloy, inconel, carpenter, duplex/super duplex and nickel alloys. They serve the power generation, water and wastewater treatment, agriculture, food processing, oil & gas and chemical industries plus many heavy industrial projects.
