

Dixie-Southern Painting Department Achieves NACE Certification

Mark Medon, the head of the Dixie-Southern Painting Department recently obtained his NACE certification. Mark takes great pride in all the projects that he has taken part in at Dixie-Southern. His NACE Certification is just the latest example of his deep passion for the industrial coatings industry. Individuals with NACE certification show that they have reached the highest level of standardization in their specialty area, which is important in today's global economy.

"I am looking forward to taking the coatings department at Dixie Southern to the next level," Mark said. "I will finish NACE level 2 and peer review early this year."

What is NACE Certification?

The NACE International Institute was formed in 2012 to support corrosion control certification to promote public safety, protect the environment, and reduce the economic impact of corrosion. NACE has many different specialized courses, for everything from pipelines to bridges.

The NACE Cathodic Protection (CP) Program is the most specified and recognized CP training and certification program in the world. Cathodic protection is a technique we use to control the corrosion of a metal surface by making it the cathode of an electrochemical cell. In this way, the attached anode "sacrificial metal" corrodes instead

About Us:

Established in 1976, Dixie-Southern is a privately-owned corporation that specializes in the custom fabrication of large steel and stainless-steel industrial process components. We serve a number of industries with a range of products, all of which are certified

of the protected metal. The NACE Cathodic Protection (CP) Program provides the theoretical and practical fundamentals for testing, evaluating, and designing both galvanic and impressed current cathodic protection systems.

What it means for Dixie-Southern Customers

Dixie-Southern works with companies in heavily regulated industries where safety and reliability are non-negotiable. That's why we commit to all American Society of Mechanical Engineers (ASME) fabrication standards for all the components, assemblies, and fabrications we create and continue to achieve universally accepted standards for performance and reliability. We are proud to be [a leading ASME fabricator](#), and we look forward to meeting your specific needs!

by ASME, API, and other organizations.

Products:

ASME code and non-code tanks
Pressure vessels
Large diameter pipe
Exhaust Stacks
Ductwork
Spool pieces
Silos
Bins
Hoppers
Wind turbine towers
